SOURCE [REDACTED] 25X1X

1. The ammunition depot of the JINCE (N 50/L 44) military post was composed of two wooden buildings, one brick building with basement and red "Eternite" roof, and one semi-under-ground ammunition storage bunker. The depot was located southwest of the JINCE barracks.
2. Soldiers were seen transloading and sorting ammunition boxes. It was learned [REDACTED] that artillery 25X1X ammunition and some infantry ammunition was stored in the depot. Shipments of tank ammunition arrived in early November 1949. [REDACTED] JINCE was slated to become a military post for tank troops. A new vehicle shed, 260 x 35 feet was under construction in the barracks area.

25X1X [REDACTED] Comment:

An artillery range is located near JINCE. The reported ammunition depot is therefore stocked primarily with artillery ammunition. Further information is required to determine what tank unit, if any, is to be stationed in JINCE. The arrival of tank ammunition indicates that the JINCE artillery range may also be used as a tank firing range.
